

## ***What the World of Education Says about the Labdisc***

### **EDUCATORS**

“Your Labdisc is one of the few really innovative items I have seen at BETT in the last few years. I think the BETT presentation really showcases how the Labdisc can be a really versatile tool for schools at all levels with iPads”

**Andrew Rhodes, Director of Technology, International School of Stavanger, Norway**

“We’ve worked with leading science probe suppliers but the wireless Labdisc built-in sensors are much more convenient, simultaneously collecting data from multiple parameters and projecting it onto Google data maps.”

**Stuart Fleischer, GAIA Project Director, Israel and Czechoslovakia**

“In a classroom when I have a lesson to teach. I do not want to spend 20 minutes trying to set up a piece of equipment that has lots of peripheral cables, attachments etc., it would be so much easier to have all the necessary bits on one piece of equipment. For that reason I found the Labdisc to be the most student-friendly”

**Mr. Paul Childers, Head of Science Bedes School, UK**

“The Labdisc tremendous set of features aids technology proficiency and inquiry-based learning. It has a decisive quality that is simple and user-friendly without exception. “The Labdisc IS inquiry - with it students can measure, investigate, solve problems and construct their own experiments to improve their hypotheses.”

**Sergey Lowjagin, Physics Teacher, Russia**

“Our experimentation with the Labdisc generated positive emotions in students because they discovered science through their own hands and minds. They loved the process so much that created their experiments and conclusion on a poster, with drawings of each stage, together with experiment results to help others understand what they had done.”

**Carla Lueiza, Science Educator Trainer, Chile**

**INDUSTRY**

“Must be really exciting times for you! The hype around Labdisc (especially from the Apple guys) is something I have rarely seen.”

**Christian Alopaeus, Ilona IT Oy**

“I am very impressed with all you're doing for education. “

**Yovel Badash, NaMaYa Team**

“I have been in the business almost 17 years and when all the competitors cannot invent more, you actually do it”

**Glenn Ghase, KPT Komet AS**

“We believe your new Labdisc concept to be the future of the educational data logging market.”

**Maxat Tulepov, Head of IT Department, KazInterService Company**

“It’s a pleasure to be an Ambassador for your product, I think it is excellent.”

**Joe Moretti, MD - Education Mentor / Distinguished Educator (for Apple)**

“The highlight of BETT was seeing and receiving a demonstration of the Labdisc.”

**Andy Wilcox, Buyer for The Consortium**

"The Labdisc represents the natural *and* successful evolution of mobile devices for capturing and analysis of scientific data"

**Sebastian Miranda, Efecto Educativo**
